Roll Call calculates net worth based on the minimum assets and minimum liabilities listed in each lawmaker's annual financial disclosure report. Those reports exclude some assets including primary residences, however, and may not provide a full representation of a Member's financial portfolio. See story for details. Because of a change in Roll Call's methodology in 2008, figures listed for 2006 may not reflect previously reported estimates. Financial estimates for 2006 have been recalculated to reflect the new methodology.
